Figures follow the flow of the white paper. Figures 1–10 are the platform surfaces (marketing → shell → engines → Fund OS → AI → LP room); Figures 11–14 are the email-provider (Resend) dashboards behind the measured deliverability results in §13.4. All counts are live production data at the time of writing; the fund name *Summit Venture Studio* is redacted.

Figure 1 || Marketing home (light)

Editorial serif hero over a generative particle field; primary CTAs *Start Fundraising* / *See How It Works*; trust bar (20K+ firms, 40K+ HNWIs & LPs, 50+ countries, 60K+ investors — the marketing figure; the audited investors table holds 47,275). Cf. white paper §2.1.

Figure 2 || Products mega-menu

Left rail of suite tabs (Founder Suite / Fund OS / Investor Room) driving a right panel of features — one taxonomy, three persona views. Cf. §2.2.

Figure 3 || Investor Database (public)

“Every active investor, ranked for your round” — 18,000+ firms, 47,000+ decision-makers, 84 geographies, weekly re-crawl. Cf. §2.3, §9.1.

Figure 4 || In-app shell (Fund OS persona)

The logged-in shell — top bar, contextual left rail of ~28 grouped destinations, command palette (Cmd+K), and the workspace. Cf. §5.

Figure 5 || 409A / OPM valuation engine

Request an audit-ready 409A (method = OPM); common FMV back-solved from the preferred price via Black-Scholes call-spreads across breakpoints; versioned FMV history. Cf. §6.1.

Figure 6 || Loan servicing (private credit)

Loan Operations
Originate, service, and track private-credit loans — principal, interest, maturity, and covenants in one book.

Summary:

LOANS	OUTSTANDING	AVG. RATE	ACTIVE
0	\$0	—	0

Originate a loan

BORROWER * PRINCIPAL (\$) RATE (%)

ORIGINATION MATURITY AMORTIZATION

BORROWER	PRINCIPAL	RATE	MATURITY	AMORTIZATION	STATUS
No loans yet. Originate your first above.					

Originate and service private-credit loans — principal, interest, maturity, amortization (level / interest-only / bullet), and covenant tracking in one book. Cf. §6.2.

Figure 7 || Share Plans (equity vesting)

Share Plans
Set up your option pool, grant options online, and track scheme usage — synced to your cap table.

Summary:

OPTION POOL	GRANTED	AVAILABLE	GRANTEES
Set pool	0	0	0

Grant options

GRANTEE * EMAIL OPTIONS *

STRIKE (\$) GRANT DATE VEST (MO) / CLIFF (MO)

GRANTEE	OPTIONS	STRIKE	GRANT DATE	VESTING	STATUS
No grants yet. Set your pool and issue the first grant.					

Option pool + online grants with cliff-aware vesting, synced to the cap table (grantee, options, strike, grant date, vest/cliff months). Cf. §6.3.

Figure 8 || Fund OS overview

The fund workspace — Deals, Investments, Economics, Ledger, Fund plan, Syndication, Management co., LP imports, Legal, Assessment — all reconciling to one ledger. Cf. §7.

Figure 9 || AI Assistant — Fund Copilot

The tool-calling agent adapted into the GP persona: score firms vs. thesis, match LPs, summarize the pipeline for IC, draft an LP update. Cf. §8.

Figure 10 || LP Investor Room

Self-serve capital account (committed / called / uncalled / distributed / est. NAV / TVPI) with a badged owner-oversight mode. Cf. §7, §10.3, §12.

Figure 11 || Family-office webinar — deliverability

Resend dashboard, an-ker.de: 419 emails, 84.25% deliverability, 0% spam complaints. Cf. §13.4.

Figure 12 || Family-office webinar — engagement

Open 58.64%, click 25.5%, bounce 15.27% (42 permanent / 22 transient). Cf. §13.4.

Figure 13 || Founder→VC outreach — deliverability

Resend dashboard, an-ker.de: 300 emails, 90.67% deliverability, 0% complaints; peak send Aug 10–11. Cf. §13.4.

Figure 14 || Founder→VC outreach — engagement

Open 35.29%, click 10.29%, bounce 9.33% (24 permanent / 4 transient) — deliverability up and bounce roughly halved vs. the earlier batch. Cf. §13.4.
